

Price & Congestion Forecasting and Asset Valuation Services

Perform asset valuations, price and generation forecasts, and transmission risk analysis

- Analyze transmission congestion related risks and asset valuation (e.g. for TMPA, BTU, AES, Invenergy, ArcLight Capital, Direct Energy, Barclay's and others using tools such as DAYZER, PROMOD and UPLAN)
- Extensive experience, knowledge and access to information for the ERCOT market that is invaluable for accurately modeling the ERCOT system
-

Nodal Insight service for the ERCOT market being developed by Crescent Power will provide the following:

- Market data that is easily accessible and tools to analyze that data
- Price forecasts for Day-Ahead Market, Real-Time Market and CRR Auction decision support
- Addresses unique Texas Nodal design elements
- Provides a full range of analytical capabilities delivered over the web
- More cost effective than maintaining a large internal team with expensive tools and hardware
