Price & Congestion Forecasting and Asset Valuation Services

Perform asset valuations, price and generation forecasts, and transmission risk analysis

- Analyze transmission congestion related risks and asset valuation (e.g. for TMPA, BTU, AES, Invenergy, ArcLight Capital, Direct Energy, Barclay's and others using tools such as DAYZER, PROMOD and UPLAN

- Extensive experience, knowledge and access to information for the ERCOT market that is invaluable for accurately modeling the ERCOT system

Nodal Insight service for the ERCOT market being developed by Crescent Power will provide the following:

· Market data that is easily accessible and tools to analyze that data

· Price forecasts for Day-Ahead Market, Real-Time Market and CRR Auction decision support

· Addresses unique Texas Nodal design elements

· Provides a full range of analytical capabilities delivered over the web

· More cost effective than maintaining a large internal team with expensive tools and hardware
