Nodal Analytics is a turn-key analytics solution for the Texas Nodal Market that is delivered over the web providing both market-wide and client-specific decision support information.

Nodal Analytics:

Nodal Analytic service for the ERCOT market being developed by Crescent Power will provide the following:

· Market data that is easily accessible and tools to analyze that data

· Price forecasts for Day-Ahead Market, Real-Time Market and CRR Auction decision support

· Addresses unique Texas Nodal design elements

· Provides a full range of analytical capabilities delivered over the web

· More cost effective than maintaining a large internal team with expensive tools and hardware
